

AVIAN INFLUENZA OR “BIRD FLU”

COMPREHENSIVE RESPIRATORY PROTECTION

Scott Health & Safety is one of the world's leading manufacturers of respiratory protective devices and provides practical and comfortable solutions for those concerned with preventing the spread of bird flu.

Scott's range protects people in regular contact with birds and poultry, workers involved in clearance, clean-up or culling operations, medical staff and carers or any individual concerned about contact and infection.

Health authorities around the world recommend respirators with particle filtration to protect against viral infections, along with close fitting eyewear and, where the application warrants it, overalls or gowns, suitable gloves and washable footwear. Scott Health & Safety's respiratory protection is designed to be fully compatible with other personal protective equipment and provides P3 particle filtration, the highest efficiency EN approval class. For operatives who may need additional protection against gases from organic matter or from fumigation and clearance chemicals, combined filters providing AP3 and ABEK P3 filters are also available.

PROFILE² HALF MASK RESPIRATOR

The Profile² is a re-useable respirator with replaceable twin filters. The TPE facepiece is soft and comfortable and is latex and silicone free. Profile² is easy to fit, lightweight and unobtrusive and is available in three sizes. It can be readily cleaned between uses with Trigene, an anti-bacterial cleaning solution available as liquid or impregnated wipes. The P3 Ready-Pak™ includes one mask and two P3 filters. Other Ready-Pak™ options include A2P3 and ABEK1P3 filters.

Ordering details:

Mask and Filters – Ready-Pak		Replacement Filters	
032170	P3 Ready-Pak S	053070	P3 Filters
032173	P3 Ready-Pak M	044081	A2P3 Filters
032176	P3 Ready-Pak L	044083	ABEK1P3 Filters
032181	A2P3 Ready-Pak S	Trigene cleaning solution	
032184	A2P3 Ready-Pak M	013.025.01	Pack of wipes (100)
032187	A2P3 Ready-Pak L	013.028.01	5 litre container
032172	ABEK1P3 Ready-Pak S		
032175	ABEK1P3 Ready-Pak M		
032178	ABEK1P3 Ready-Pak L

POWERED RESPIRATORS

Anyone who cannot achieve an efficient seal with a half mask, for example because of a beard, should consider using a Powered Air Purifying Respirator (PAPR) with a hood.

It is also most likely that those working for long periods will find a PAPR beneficial, as it is significantly more comfortable to work in for periods over one hour. Scott's PAPR range provides the same choice of filter types and many hood options. Three of the most suitable choices of headtop to protect against bird flu are shown below.

TORNADO

Tornado is a modular PAPR system. It is adaptable by the user to accept one P3 filter or three combined filters (requires Tor/Adapt). It allows full shift operation from a single re-charge of the battery and delivers an electronically maintained continuous airflow to the breathing area. The battery is demountable and can be readily replaced with a charged one if continued working is required. Tornado is easily wiped clean with Trigene between uses.

Ordering details:

T/Power	Tornado blower & belt	Tor/Adapt	Adapters for Combi filters
Tor/Batt/Lite	8 hr NiMh battery	TF220	A2PSL filter
Tor/BC/SM	Charger UK/EU/Aus	TF223	K1PSL filter
PF251/2	PSL filter	TF233	ABEKHgPSL filter
PF251/Super	PSL long life filter		

PROFLOW

The Proflow SC also controls airflow electronically to ensure it is correctly maintained. It also data logs all usage on the on-board chip and provides easy download of the data for servicing and record keeping. The integral battery and motor are housed in a 'shock proof' body and the twin filters face down, making the unit suitable for shower decontamination.

Ordering details:

064024	Proflow SC including blower, NiMh 9.6V battery, charger, hose and belt
052670	PF10 P3 filter
042670	CF22 A2P3 filter
042799	CF32 ABEK2P3 filter

T2/FLOWHOOD2

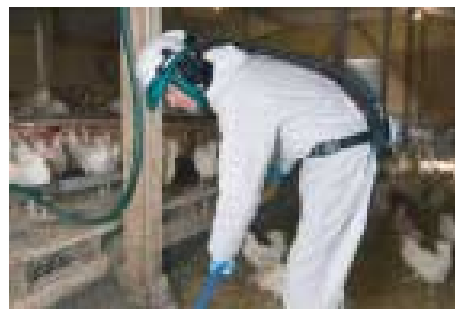

A lightweight full hood with a flexible acetate visor. Overcomes any fit issues such as spectacles or facial hair. Highest level TH3 PAPR protection.

T5/FLOWHOOD5

Provides head protection and a choice of polycarbonate or acetate impact visor, combining head, face and mid-level TH2 PAPR protection.

T25/FLOWHOOD25

For the most demanding applications, this headtop provides head and face protection and a full hood in Hypalon, to also provide chemical splash resistance. The hood overcomes any fit issues such as spectacles or facial hair. Highest level TH3 PAPR protection.

Ordering details:

T2	T2, for use with Tornado
064282	Flowhood 2, for use with Proflow SC

Ordering details:

T5/PC	T5, for use with Tornado
064286	Flowhood 5, for use with ProflowSC

Ordering details:

T25/PC	T25, for use with Tornado
064284	Flowhood 25, for use with ProflowSC

All the products listed above are CE marked and approved to the appropriate EN standard as well as many other national standards. Full details available on request.
